

NZDSOS

NEW ZEALAND DOCTORS SPEAKING OUT WITH SCIENCE

A CALL TO ACTION

Monday 28 June 2021

Dear elected representative,

NZDSOS is a group of doctors, dentists and scientists who are concerned about the safety of the roll-out of the Pfizer vaccine in New Zealand and the lack of balance in the information being presented. Today we are reaching out to you. Why, may you ask?

We have written polite, insistent, and repeated letters of urgent concern to the Prime Minister, Director General of Health, relevant ministers, Medsafe, our professional medical bodies and, more recently, the Ombudsman, Health and Disability Commission and some media (See: <https://nzdsos.com/letters/>). So far, our presented evidence of risk from the vaccine, and its proven harms, has remained unacknowledged by Medsafe. Attempts at rational conversation are usually met either with silence or attacks by the mainstream media, so we are contacting **you**, our elected representative, with the hope that you will listen to our deep concerns and stand with us to protect our most cherished rights.

Over 20 000 people have now died following covid-19 vaccination in the US and EU alone, as of June 8 2021, based on official reporting systems. These systems are known to under-report significantly. So far, *pro rata*, at least 10 Kiwis have almost certainly died. We know of some of these people. Many more have been injured. (For bioethical context, the 1976 swine flu jab was 'pulled' after 50 deaths.)

Our experimental 'trial of 5 million' has already taken casualties. *We know*, because it is our business to listen that there is a growing number of 'vaccine regretful', especially coerced health workers, and their anger is growing. *We know* because it is our business to observe and report that the CARM system is not receiving and dealing with all the injury reports post vaccine - we know of 'technical issues' and flat-out non-reporting. *We know* that you can't rule out a death from vaccination without a detailed and painstaking inquiry including a postmortem, by trained investigators given the time they need. How then can a government minister confidently state that there is no link two days after a suspicious death?

And yet, based on the most up to date scientific evidence, COVID-19 is actually no worse than another 'flu' whereas there is mounting evidence that the risks of this 'vaccine' are greater than the disease itself. Consequently NZDSOS is urgently calling for the roll-out to be halted.

We invite you to listen on Bitchute or Rumble to hear what expert doctors Peter McCullough, Roger Hodkinson, Sucharit Bhakdi, Michael Yeadon, Tess Lawrie, Robert Malone (the inventor of mRNA technology) and many others all have to say, and read our attached letters of concern and rebuttal, or visit our website to refresh your memories on the Nuremberg and UNESCO declarations. Why Bitchute and Rumble? Censorship, de-platforming and the search engine manipulation effect (SEME) are all relied upon to maintain and match a single narrative in the mainstream media, social media and on-line searches. Is the narrative so fragile it resists information and wider debate? Why a fear of information and of the truth? What happened to free speech and open scientific discourse?

Collectively we have many hundreds of years of highly relevant clinical and scientific experience so please do not simply discard our heartfelt plea as another conspiracy theory. The lazy de rigueur claim of 'conspiracy theory' does not constitute an informed, civilised or ethical response. It is a logical fallacy and an ad hominem attack with no place in any scientific discourse. Our concerns began with the unethical, non-consented and deeply worrying circumstances of a running experiment conducted on society, a novel experiment whose outcomes cannot be known and only guessed. These concerns have continued to grow with the evolving data and information from published studies and reports. If there is a theory of a conspiracy, then it is your duty to thoroughly investigate it to test its validity. We have done our homework; now you must do yours.

At NZDSOS, we are standing up for all our fellow New Zealanders, including you and your children and anyone who, for any reason, is unable to do so. We are here for you and ask for your unwavering support in protecting our most precious rights. Plainly, we do not do this lightly but to not speak out now is unconscionable.

Finally, let us look at some *real* covid vaccine disinformation, some of it from the Prime Minister herself:

All the actual truth is in your parliament's possession, sent by us, as on our website:<https://nzdsos.com/>

1. *Injection stays in the arm.* UNTRUE
2. *Makes an inert harmless protein.* UNTRUE
3. *Not possible to change our DNA.* UNTRUE
4. *Better than natural immunity.* UNTRUE
5. *Vaccine is the only effective option against covid-19 infection.* UNTRUE
6. *The Pfizer Comirnaty has been tested like our registered vaccines.* UNTRUE
7. *Approved in NZ.* UNTRUE
8. *Is not an experiment. That is ridiculous.* UNTRUE
9. *Medium and long-term complications are known.* UNTRUE
10. *Will be voluntary and you can keep your job and live normally.* UNTRUE
11. *Will protect against the variants now all over the world.* UNTRUE
12. *Hydroxychloroquine was proven unsafe and ineffective.* UNTRUE
13. *Ivermectin has no evidence as a cure for the pandemic.* UNTRUE
14. *Asymptomatic people spread the infection.* UNTRUE
15. *Children are at risk of significant harm from covid.* UNTRUE
16. *Only our MOH and the government can be trusted as the single source of truth.* UNTRUE
17. *The vaccine companies have to pay out for injuries.* UNTRUE

And, saving the best until last: *Safe and effective.* **YEAH RIGHT!**

The Safety of COVID-19 Vaccinations—We Should Rethink the Policy. Harald Walach , Rainer J. Klement ,and Wouter Aukema. *Vaccines* 2021, 9(7), 693; Published: 24 June 2021.<https://www.mdpi.com/2076-393X/9/7/693/htm>

Will covid-19 vaccines save lives? Current trials aren't designed to tell us. *BMJ* 2020;371:m4037 Published 21 October 2020. <https://www.bmj.com/content/371/bmj.m4037>

COVID-19 vaccine efficacy and effectiveness—the elephant (not) in the room. Piero Olliaro, Els Torreele, Michel Vaillant. *Lancet Microbe*. 2021 Apr 20 [Epub ahead of print] <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8057721/>

So we ask **you**, our elected representative:
Why are you not speaking out? Is it fear? Lack of information? Coercion?

Statistically, at least 10-20% of you question authority and decide for yourselves and will already be suspicious of the vaccine narrative.

Around 70% would prefer to remain asleep but could be woken up, hopefully in time.

And a few percent are completely immune to the suffering of others. Such is life.

We NEED you to be awake at the gate, to do your duty and represent true and decent interests, so that we can be allowed to do ours. Time is shorter than you think so keep in mind the words of philosopher George Santana "*Those who cannot remember the past are condemned to repeat it.*"

Make sure you are ready to ask the right questions when they start to vaccinate your children - if you are given the chance before it happens. THIS IS NOT JUST ANOTHER VACCINE. Nor is it even remotely necessary, as we have demonstrated to Medsafe, the MOH and the government. In fact, governments around the world – including ours - are sitting on life-saving information about a treatment that could save over three-quarters of the lives otherwise lost to Covid-19. Isn't that a capital crime? Our lawyers say so, and now we have told you, our elected representative.

We are part of the team of 5 millions and we are standing up for you, your family, friends and all New Zealanders and now, we are reaching out to **you**.

May wisdom and courage guide your decisions.
