

## INFORMED CONSENT QUIZ FOR TEENS AND PARENTS

The government is now offering a free Pfizer injection to teens.

Vaccinators can only give you the Pfizer mRNA injection, i.e the 'vaccine', after you have given them your Voluntary Informed Consent.

Your Right to Voluntary Informed Consent is protected by:

- The Nuremberg Code 1947
- The Helsinki Declaration 1952
- The UNESCO Declaration on Bioethics and Human Rights
- NZ Bill of Rights 1990

It means nobody can pressure you to accept a medical intervention, medical treatment or to take part in a medical experiment.

Are you fully informed so that you can give an informed consent for an injection with the novel Pfizer mRNA injection?

Unsure?

You can check your level of information by answering the following quiz with

YES  NO  I DON'T KNOW

---

# QUIZ

**A** - Are children and teens at risk of significant harm from Covid-19 infection? YES   
NO  I DON'T KNOW

**B** - Is the Pfizer mRNA injection better than natural immunity?

YES  NO  I DON'T KNOW

**C** - Is the Pfizer mRNA injection the only effective option against Covid-19 infection?

YES  NO  I DON'T KNOW

**D** - Do the injected substances of the Pfizer mRNA product remain in the muscle of your arm? YES  NO  I DON'T KNOW

**E** - Does the Pfizer mRNA injection make an inert harmless protein within your body?  
YES  NO  I DON'T KNOW

**F** - Will the Pfizer mRNA injection definitely protect you against future Covid-19 variants? YES  NO  I DON'T KNOW

**G** - Has the Pfizer mRNA injection been tested like our fully registered vaccines? YES   
NO  I DON'T KNOW

**H** - Are you participating in a medical experiment if you take the Pfizer mRNA injection?  
YES  NO  I DON'T KNOW

**I** - Doctors and scientists don't yet know the potential medium and long term complications such as infertility and auto immune disease. Is that true? YES  NO   
I DON'T KNOW

**J** - Do the Ministry of Health, the government and the NZ media fully inform you on the efficacy and safety aspects of the Pfizer injections?

YES  NO  I DON'T KNOW

**K** - Do the pharmaceutical companies have to pay out for injuries and damage caused by the Pfizer mRNA injections?

YES  NO  I DON'T KNOW

**L** - Do you think that getting the Pfizer injection will allow life to return to normal?

YES  NO  I DON'T KNOW

## RESULTS OF THE QUIZ

- If you have answered all the questions with "I don't know" a good resource is [www.nzdsos.com](http://www.nzdsos.com) the website of NZ doctors Speaking Out with Science. Also visit [www.voicesforfreedom.co.nz](http://www.voicesforfreedom.co.nz)
- If you have answered questions H and I with YES and all the other questions with NO you are well informed to make a proper risk-benefit analysis.
- If you have answered most questions with a YES you can look at the information and references in the Open Letter *A Call to Action* - dated 28 June 2021 on <https://nzdsos.com/letters>.

Answers to questions:

**A** NO | **B** NO | **C** NO | **D** NO | **E** NO | **F** NO | **G** NO | **H** YES. The clinical trials of the medical experiment with the Pfizer mRNA gene therapy won't be completed until May 2023. You are about to decide whether or not to participate in that trial.

**I** YES | **J** NO | **K** NO. The burden of any damage caused by the injection will be on Nzers.

**L** NO. We will let you do some research and figure out why for yourself..
