

NOTICE OF LIABILITY FOR HARM AND DEATH

SILENCE IS ACQUIESCENCE, AGREEMENT AND DISHONOUR

This Notice of Liability may be relied upon and used as evidence in court proceedings. It must not be altered in any way before or after serving.

Served To:

Name(s), Occupation(s),Address: _____

(To the employer and employees and anyone associated with the job experiments and/or discrimination based on vaccination status at (address above), the employer can be held vicariously liable for actions of the employees)

It is strongly advised that you read and comprehend this notice in its entirety. Failure to do so will not provide you with a defence. You may still be held liable for any harm or death that arises from your action or inaction. Ignorance of the law is not a defence.

Purpose

This lawful Notice of Liability for Harm and/or Death intends to inform you that you may be held liable for any harm, suffering, disability or death that arises from the enforcement of, implementation and/or administration of all experimental COVID-19/SARS-CoV-2 mRNA gene therapies, injections, and/or viral vector injections/vaccines.

It is not intended to cause you distress or harm but to protect you from civil and/or criminal liability under NZ's Natural Law principles in relation to your action(s) and/or omission(s) to act to prevent harm in relation to the alleged Covid-19/SARS-CoV-2 pandemic. These measures include, but are not limited to, the promotion and administration of the injection, implementation of policies on wearing face-masks and testing requirements using the RT-PCR and lateral flow tests, enforcing mandates and lockdowns, and enabling discrimination.

Cease and Desist

It is ethical and lawful to issue this Notice, demanding that all persons immediately **cease and desist** from direct or indirect participation in the manufacturing, distribution, administration promotion or support of the experimental Covid-19/SARS-CoV-2 mRNA gene therapies, injections, and/or viral vector injections/vaccines, which continue to cause immeasurable and avoidable trauma, harm, disease, death and loss to the NZ population.

Liability

You may be held personally, privately, civilly and/or criminally liable for participating in unlawful, illegal and/or criminal activity including assault and/or murder and/or failing to prevent acts so

defined, that are directed against living men and women, adults, children, new and expectant mothers and babies.

If you coerce or bribe someone to have the “vaccination”, through threats of job loss or via discriminating and denying entry to facilities or essential services (e.g. medical services), or via other means, you are acting in breach of national laws, international treaties and conventions as well as the Common laws of England¹ and would therefore be an accomplice to procure the administration of a substance that is officially recorded to cause death and serious injury. Furthermore, any conversation, or document you have written, used to coerce anyone into receiving the injection(s) can also be used as evidence against you.

The New Zealand Government has admitted that the injection(s) have killed and maimed people across the country. In an open letter from the Ministry of Health, dated 15 December 2021, Dr Bloomfield admitted that the Pfizer injection can cause pericarditis and myocarditis. Coroner reports confirm that death has been directly attributed to the “vaccination” (myocarditis), however the extent of harm is not being communicated to the NZ public.

Primum Non Nocere - First Do No Harm

In New Zealand, vaccine related deaths have been officially reported at the following site;

See: <https://www.medsafe.govt.nz/COVID-19/vaccine-report-overview.asp>

A truer, but still approximate number of injuries and likely deaths following administration of the “vaccine”, is currently assessed to be closer to 300 dead and many thousands seriously injured, rising daily. A “Citizen's Initiative” estimate, though almost certainly still extremely conservative, is found here:

See: <https://nzdsos.com/injections/>

NZ Criminal Legislation

If you administer, or support the administration of, a toxic poison into a living man or woman, Under Section 200 of the Crimes Act 1961, you could be charged with murder - the penalty for which carries a sentence of life imprisonment with non-parole period of at least 10 years. Section 201(1) states that everyone is liable to imprisonment for a term not exceeding 14 years who, wilfully and without lawful justification or excuse, causes or produces in any other person any disease or sickness. Section 188, wounding with intent, states that Everyone is liable to imprisonment for a term not exceeding 14 years who, with intent to cause grievous bodily harm to any one, wounds, maims, disfigures, or causes grievous bodily harm to any person.

NZ Health and Safety Legislation

Under subpart 4, Section 47 of the Health and Safety at Work Act 2015, a Person Conducting a Business or Undertaking (PCBU) may be liable for very heavy fines of up to \$300,000, or face five years imprisonment for displaying reckless conduct in regard to their duty to provide a safe workspace for their staff. **You cannot contract out of this duty.** This means that even though you may say you did not know the injection is dangerous, you are regarded at law to have been ‘reckless’ not to have investigated it for yourself;

Pfizer Admits Injection can cause Multiple Adverse Reactions

¹Section 5 of the NZ Imperial Laws Application Act 1988. Application of Common Law of England; After the commencement of this Act, the common law of England (including the principles and rules of equity), so far as it was part of the laws of New Zealand immediately before the commencement of this Act, shall continue to be part of the laws of New Zealand.

According to the official Pfizer report entitled, 'Cumulative Analysis of Post-Authorization Adverse Event Records Reports', in just the **first 90 days** of the injection roll out under the FDA's EUA, between 01 December 2020 – 28 February 2021, there were **tens of thousands of reported adverse reactions, including over 1200 deaths.**

The report was finalised by Pfizer on 30 April 2021 and the extensive list of reported side effects were well documented and **predate the injection rollout across NZ, thus being available to the Medsafe regulator.**

The single-space typed list of adverse reactions continues for an alarming 9 pages of over one hundred serious categories of illness including; kidney failure, stroke, cardiac events, pregnancy complications, inflammation, neurological disease, autoimmune failure, paralysis, liver failure, blood disorders, skin disease, musculoskeletal problems, arthritis, respiratory disease, DVT, blood clots, vascular disease, haemorrhage, loss of sight, Bell's palsy, and epilepsy.²

The Injection is not a Vaccine

The injection does not introduce the microbe to the body like traditional vaccination. It does **not reduce infection or transmission**, and in fact it worsen outcomes. <https://stevekirsch.substack.com/p/pfizer-ceo-says-two-covid-vaccine>

There are valid references for all medical statements made in this document. It is a brand new technology introducing artificial gene code. Unlike a vaccine, which is designed to trigger the immune response, this procedure triggers the creation of the most damaging part of the virus itself. The immune system may not ever return to what it was, after receiving a covid injection. Several high-level immunologists and vaccine designers, including former Pfizer VP and chief of respiratory and allergy, Dr Mike Yeadon, have warned of a worst possible scenario, that many people who have received these m-RNA treatments could actually **perish**. Indeed animal studies conducted in 2012-2013 to test mRNA vaccines found most animals died when re-exposed to the coronaviruses, from antibody-dependent enhancement (ADE). This exaggerated reaction has plagued all coronavirus reactions, whatever the technology used to make them. Hence people still ask "why is there no cure for the common cold?"

Harm caused by Adverse Reactions to the People of NZ

The NZ Health Forum and other groups have collected unofficial reports of adverse effects and death following after vaccination. Out of 700+ reports of death compiled by the forum, over 300 have been assessed by medical professionals as temporally linked to the injection and the details reported to Medsafe (for detailed assessment as in any usual drug trial) who have dismissed these concerns without a proper and cautious investigation. Pharmacovigilance is dismantled.

Injuries from the injection include symptoms such as chest pain and breathlessness, blood clots, brain fog and headaches, extreme fatigue, neurological symptoms, tachycardia, stroke, heart attacks and inflammation, and many more.

Any of the above symptoms on their own should be raise alarm bells with Medsafe's independent safety monitoring board, as 'signals' of potential health problems. However, the reporting of likely reactions to the injection has not been made mandatory and there is no requirement for medical professionals to submit a report. Studies show that only between 1%

² Pfizer Cumulative Analysis of Post-Authorization Adverse Event Records Report: <https://phmpt.org/wp-content/uploads/2021/11/5.3.6-postmarketing-experience.pdf>
<http://indepthnh.org/wp-content/uploads/2021/10/COVID-Report-from-Rep.-Weyler-3.pdf>

and 20% of drug reactions are ever reported, with the under reporting factor (URF) settling at around 40 for the covid shots on the US VAERS database. Reporting is onerous and voluntary.

The reporting of adverse reactions is considered to be “anti-vax” behaviour by the NZ Government and mainstream media, with implied threats to harm the career and reputation of those wishing to submit a CARM report or speak out.

Miscarriages and stillbirths are rapidly increasing among the vaccinated and grave concerns must and do exist regarding developmental delays and issues in babies from vaccinated mothers. The Pfizer trial used to gain authorisation for emergency use specifically banned pregnancy among the recipients of the experimental therapy, therefore there is ZERO data, and Pfizer’s recorded US vaccine advice message recommends *against* vaccinating in pregnancy.

Other post injection reports include unusual skin rashes, abdominal pain, constipation, exhaustion and prolonged fatigue. Post-viral syndromes such as Guillain-Barre, Bell’s palsy, shingles and glandular fever represent an ineffective or imbalanced immunity and may have concerning medium to long term implications for patients, alongside the onset of the more severe side effects mentioned. Signs are emerging of a dramatic rise in all cause mortality amongst the vaccinated.

The level of injuries caused by the vaccination can no longer be suppressed. The harm is unprecedented, globally and locally. Commentary, and the testimonials of those suffering from post-injection harm can be found on NZ various sites;

Harm caused by Face Coverings

Despite the repeated message to the NZ population that wearing a face covering is mandatory, for all practical purposes, mask wearing in this country is optional. Health and safety has nothing to do with it. The word “mandatory” has been designed to confuse you.

Wearing a face covering is optional because the lowest threshold for not wearing a mask is having "a condition which make wearing a face covering unsuitable" **as adjudged by yourself**. Government agencies have confirmed that the police will not prosecute people for not wearing masks, yet the population lives in fear of what will happen if they do not comply.

The World Health Organisation (WHO) has admitted that there is no evidence available on the usefulness of masks to protect non-sick individuals. Our MOH stated the **main purpose is to remind people there is a pandemic**. This is to induce blind obedience. In addition to raising CO2 levels harmfully, breathing through facemask deposits bacterial and germ components on the inner and outside layer of the facemask. These infectious components are repeatedly re-breathed back into the body unless masks are changed very frequently.

Breathing through facemasks also increases temperature and humidity in the space between

the mouth and the mask, resulting in a release of toxic particles from the mask's materials. Rebreathing contaminated air with high bacterial and toxic particle concentrations along with low O₂ and high CO₂ levels continuously challenge the body homeostasis, causing unwellness and immunosuppression.

***"We don't generally recommend the wearing of masks in public by otherwise well individuals because it has not been up to now associated with any particular benefit...It does have benefit psychologically, socially and there are social norms around that and we don't criticise the wearing of masks and have not done so but there is no specific evidence to suggest that the wearing of masks by the mass population has any particular benefit."* - W.H.O. Press Conference, March 2020.**

By wearing a mask you are supporting a government directive that exists purely to control you and to show the population at large that you are controlled. It also causes harm. Removing your mask is not only your **right** but your **duty**.

A compilation of evidence against mask wearing is identified as follows:

Industrial hygienist, Kristen Meghan further clarifies the harm caused by face coverings. This video amassed over 100K views on various social media before being deleted as "fake news" by You Tube and Facebook.

<https://voicesforfreedom.co.nz/storage/app/media/downloads/Kristen-Meghan-1-Jan-2020.mp4>

Widespread Censorship

Since 2020, Twitter, Facebook, and YouTube have been censoring, suppressing, and flagging any Covid-19 virus-related information that goes against the World Health Organisation (WHO) recommendations as a matter of policy. Governments around the world are using the 'pandemic' as a means to crack down on free expression and access to information.

Authorities have blocked legitimate websites and ordered the removal of unwanted content. Officials have reinforced these controls by criminalising more categories of online expression and arresting journalists, activists, and members for public speaking about the government's performance.

Less than 5% of adverse events are reported because the majority of the population is not even aware of the existence of reporting systems for vaccine injuries. Secondly, the pharmaceutical industry has been waging an unrelenting media war over the past decades against medical experts who attempted to inform the public about the downsides of vaccines. Name-calling, e.g. by the use of the negative label 'anti-vaxxer', has been chosen to shame and blame any healthcare professional, scientist or other member of the public when speaking out about vaccine harms.

Consequently the majority of medical professionals are too scared to report adverse events, or to speak out against the government narrative. The few brave ones are coerced into signing voluntary undertakings to keep silent, or lose their licences and/or their funding. Some are beginning to fear for their own lives, as they fear for their patients'.

Manufacturer protection against liability from harm (*unless caused criminally*) means **there is no recourse for those injured by the injection(s), unless they can get an ACC claim accepted after convincing their GP or specialist, who may be anxious to avoid censure by medical regulators.**

Dangers of PCR Testing

A review from the University of Oxford's Centre for Evidence-Based Medicine found that the standard PCR test used to detect the presence of Covid-19 is so sensitive that it can detect old infections by picking up fragments of dead viral cells. Even its Nobel prize-winning inventor, Kary Mullis, has declared that PCR was never intended to diagnose a disease, merely confirm clinical symptoms. This “pandemic of testing” has been used to exaggerate the scale of concern in the public mind, and to justify the power grab and abrogation of human rights.

The test essentially uses amplification cycles to find viral RNA (genetic code). The sample is repeatedly chemically amplified to increase the RNA copies until they can be detected. Each “cycle” of amplification doubles the number of molecules in a sample. If you run enough cycles, you can effectively find a single molecule of any substance, whereas the cycle threshold should be set around 25-26 and if the machine must run more than 25 to 35 cycles to get the sample to the test's Limit of Detection, there isn't enough virus in the sample to matter clinically. This is why there have been so many false positive recordings of Covid-19 Cases. Dr Fauci himself said the test is useless above 35 cycles. NZ runs 40 cycles or higher. In at least the US the test was run at lower cycles in vaccinated patients later showing symptoms “to reduce the risk of false positives”; then they weren't tested at all unless hospitalised or they died.

Natural Immunity Denied

Natural immunity to SARS-CoV-2 virus appears to **confer longer-lasting and far stronger protection** against infection, symptomatic disease and hospitalisation when compared to any of the current vaccines. New Zealanders are not being informed of this. See www.brownstone.org/articles/79-research-studies-affirm-naturally-acquired-immunity-to-covid-19-documented-linked-and-quoted/

Covid-19 vaccinations are not designed to stop Covid-19. A fully vaccinated person can still contract and transmit Covid-19, at least as easily, if not considerably more so (from early data regarding omicron variant). It is clear that the injection is not an effective control measure to deal with transmission of Covid-19.

In fact, it is far worse than this. Multiple large studies and public health data from around the world have proved that the **vaccine campaigns have worsened the situation**. Any other statement is simply untrue. For example, please visit www.hatchardreport.com www.nzdsos.com www.stevekirsch.substack.com and www.theexpose.uk for information.

To listen to clinician world authorities and independent experts, use non-mainstream platforms like Odysee, Rumble, Bitchute and Brighteon to hear professionals like Drs Robert Malone, Peter McCullouch, Mike Yeadon, Sukharit Bhakti, Dolores Cahill, Tess Lawrie and Pierre Kory. These sites do not censor, so do not dismiss these experts because you do not necessarily like the platform.

Informed Consent

The process of informed consent for the citizens of New Zealand has been misleading and incomplete in respect of the Covid-19 injection roll out.³ Informed consent for medical treatment is an obligation to detail the drug or process (and all that is included in it), as well as the benefits and risks existing in every treatment, and alternative options **including no treatment**, in order to enable him or her to make an intelligent personal decision. This choice **must be made freely** by the individual. It is defined as; *permission granted in full knowledge of the possible consequences*. The Medical Council has strongly affirmed this principle, until covid-19.

In New Zealand the Health and Disability Commission (*Code of Health and Disability Services Consumers' Rights*) Regulations 1996 ("the Code") enshrines informed consent into New Zealand law granting a number of rights to all consumers of health and disability services and placing corresponding obligations on providers of those services. The Government also has obligations to the people they serve and are bound by this code. Both organisations have breached this consumer law.

Coercion is *not* Informed Consent

Coerced consent is not the same as legally and ethically required and acquired informed consent. In order for consent to be free from coercion, a complete disclosure of the risks and unknowns to the participants in medical experiments; the obligations on the experimenter for care and after-care of adverse outcomes; and the freedom from coercion, stand-over tactics and overreach must all be fulfilled. These are founding principles of many codes and declarations, starting from just after the atrocities of World War 2. We are signatories to most of these but, by any definition, people **are** being forced to take these vaccines against their wills. **The right to medical autonomy is absolute, even in the face of risk to others.** This is an important principle of law.

Primum Non Nocere - First Do No Harm

This is a fundamental principle of Common law, not just of medicine. It is your lawful and legal, moral and ethical duty to uphold the law and to cause no harm, loss or injury, **and to prevent** harm, loss and injury. As a Maxim in Law, *'He who does not prevent what he is able to prevent, is considered as committing the thing'*.⁴ Therefore a person with full knowledge of a potential harm and endowed with the ability and/or duty to act upon the said knowledge in a way to avoid or otherwise mitigate the potential harm, and fails to do said actions, is liable for the inevitable harm caused, and/or may be found negligent and/or criminally liable where there is a duty of care.

Mass Covid-19 injections are killing and maiming perfectly healthy people who were never at any risk from the SARS-CoV-2 virus. Injecting people without fully informing them, misleading them through propaganda, using actors and celebrities to market the vaccines, threatening people who don't get the vaccine with their jobs or refusing to treat them or their loved ones, preventing them from going about their lawful activities because they are unvaccinated etc. are all detestable infringements on their inalienable rights and are **crimes against humanity**.

All health care workers, scientists, public officials and members of the NZ public, who ignore the evidence of the huge amount of damage being done by these gene therapies, confirmed by the adverse reporting systems throughout the world, and who perpetuate the lie that they

³See: <https://informed-consent-campaign.co.uk>

⁴[Black's Law Dictionary 2nd Edition.](#)

are perfectly safe, have abandoned their oaths and ethical standards and are **acting criminally**.

Any attempt by government, it's agencies, the police, the media, employers etc. to enforce "vaccine" passports is an open attempt at coercion and also breaches the human right to privacy. No one is entitled to know your medical status in order to allow you into a venue or to serve you.

You have an opportunity to take decisive and immediate action and prevent avoidable harm under the precautionary principle and in accordance with your legal obligations. Silence is a war crime. Withdraw your cooperation.

The Respondents have been served this Notice. This Notice in full will be made available to anyone who chooses to use it in a subsequent claim regarding the Covid-19 vaccine agenda and any effect thereof, directly or indirectly causing harm of any kind to anyone or anything.

Respectfully, govern yourself accordingly.

I believe this information to be correct. It is not my intention to harass, intimidate, offend, conspire, blackmail, coerce or cause anxiety, alarm or distress. This Notice of Liability and the enclosed information are presented with honourable and peaceful intentions and are expressly for your benefit to provide you with due process, due diligence and an opportunity to remedy this most serious matter and claim.
