Supporting Vaccine Impacted New Zealanders

The Health Forum NZ collates data regarding the impact of Covid-19 regulations on New Zealanders into a confidential Citizens' Database to record how people are being affected.

Redacted data on adverse events following vaccination will soon be available on our new website

<https://thehealthforumnz.co.nz>

If you wish to report your own changes in your health following vaccination, your experience of being "Mandated Out" or declined an exemption to our Citizens' Database, please click the button below
