

December 24, 2024

Dear Prime Minister, New Zealand Leaders and Officials including:

Winston Peters Deputy Prime Minister, Dr Shane Reti Minister of Health, David Seymour Leader of ACT, Brooke van Velden Minister of Internal Affairs, Judith Collins KC Attorney General, Chris Hipkins Leader of Labour Party, Chris James Group Manager Medsafe, Joan Simeon CEO MCNZ, Rachelle Love Chair of MCNZ, Ian Town Chief Science Advisor MoH, Diana Sarfati NZ Director-General of Health, Stephen Rainbow Chief Human Rights Commissioner, Dame Cindy Kiro Governor-General of New Zealand, Morag McDowell Health & Disability Commissioner, Helen Stokes-Lampard Chief Medical Officer Health NZ, Richard Chambers Police Commissioner, Una Jagose NZ Solicitor-General, Phil Knipe Chief Legal Advisor Ministry of Health, Dr Allan Freeth Chief Executive EPA, Dr Chris Hill General Manager EPA, Helen Winkelmann Chief Justice, Judge Anna Tutton Chief Coroner, Grant Illingworth KC RCI Commissioner, Judy Kavanagh RCI Commissioner and Anthony Hill RCI Commissioner,

We send this email very urgently, as the seriousness of the situation coming to light demands. We urge you to read despite its inconvenient timing.

Please find below the full text of an [urgent letter](#) just sent to Australian authorities. The contents apply equally to, and demand the immediate attention of, New Zealand covid vaccine decision makers.

You have received our recent [letters of concern on DNA contamination](#) of New Zealand and Australian vials of Pfizer Comirnaty, as well as Open Letters from the attached letter's author, NZ lawyer Katie Ashby-

Koppens, and genetics expert [Dr Guy Hatchard](#). All are archived at NZDSOS.com. Some were couriered for recorded delivery.

This left-over contaminant DNA, from the entirely alternative process used to make a different product to the one submitted to Medsafe for provisional consent, contains genetic code, including from a known cancer-causing virus called [SV40](#). This code seems to be showing up in human tumours post-vaccine.

You will note Australia's TGA has attempted to deny, obfuscate and now downplay the implications, whilst [internal emails](#) reveal they do appreciate the risks being uncovered. Further, the TGA has now been [caught hiding vaccine deaths](#) - perhaps unsurprisingly, as it claims in court it has [no duty](#) to Australian citizens.

Now, and even more alarmingly, a Yale study has found that these remnants are found in patients up to 2 years after they were injected. Almost certainly this means that this DNA has integrated into the nuclear genome of some cells, which are then co-opted to make the spike protein and these other foreign particles *indefinitely*. Cell death, autoimmune disease and cancers are highly possible results.

It is not possible to overstate the dangers these findings represent, and surely there must be someone in government able and prepared to understand the implications and act to withdraw these products immediately, until you can fully investigate, to confirm or refute this work.

If you continue to cover up this reality, relying on the media to keep silent at your behest, and all the while promoting this genetic product as safe whilst the government [dismantles existing protections](#) to usher in a brave new world of 'She'll be right science', you will ensure an enduring legacy of failure and spectacular damage that will haunt your

descendants forever - which parallels the forever damage to the bodies and genetic line of many injected New Zealanders.

Prime Minister, relevant Ministers, Medsafe and all responsible others who could be in the crosshairs of an outraged NZ population, we beseech you to read the letter below and act accordingly.

Additionally, since our last letter on the white clot phenomena, there is [further confirmation](#) of a brand new condition of the blood called [amyloidosis](#). Usually seen in the body's organs, this is an horrific development that we have been alerting you to since 2022. Our letters to you and medical colleges are unanswered also, but recent lab tests fit the bill for amyloid. The implications are beyond serious. We can demonstrate the amyloid clots and their analysis to anyone who wishes.

The complete capture of the ship of State by a single external narrative has been a disaster - as well articulated by DNA plasmid research Kevin McKernan [today](#) - and it is time to start fixing it. The medical results - corrupting the human genome and clogging up the blood - are surely as bad as it gets, and likely why the health system is on its knees and so many human beings are dying and diseased.

They will surely not have a Happy Christmas, and we hope you spend yours thinking and acting to do some good.

Yours sincerely,

Drs Matt Shelton, Alison Goodwin and Cindy de Villiers
